PROGRAMME SPECIFIC LEARNING OUTCOME

KMCT
DENTAL COLLEGE
Recognized Research Centre of KUHS

PROGRAM SPECIFIC OUTCOME (PSO)

- PS01-** Provide effective training on providing knowledge on recent materials in restoration.
- PS02-** Simulation based learning to improve their basic clinical skills.
- PS03-** Provide knowledge on handling and manipulation of materials according to the standards.

COURSE OUTCOME (CO)- DENTAL MATERIALS

- CO1** Provide knowledge on material science and use of various dental materials used in dentistry
- CO2** Provide knowledge on materials used for treatment of craniofacial disorders and defects.
- CO3** Identification of instruments and equipments .
- CO4** Manipulation of restorative materials
- CO5** Matricing and wedging procedures during restoration
- CO6** Basics of Stainless Steel, Alloys & Impression Materials
- CO7** Enhancing the knowledge on manipulation and fabrication of prosthetic materials.
- CO8** Application of the material knowledge in clinical aspects.
- CO9** Clinical treatment and laboratory materials, associated materials, technical consideration, shelf life, storage, manipulations, sterilization, and waste management.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PROGRAME OUTCOME BDS

COURSE: DENTAL ANATOMY AND ORAL HISTOLOGY

2022-2023

PROGRAME OUTCOME

- PO 1-** Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO 2-** Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO 3-** Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO 4-** Motivation for interdisciplinary research activities and emphasis on evidence-based dentistry.
- PO 5-** Participation in Continual Dental Educational programs to update knowledge and skills
- PO 6-** Learns significance of infection and cross infection control in dental practice
- PO 7-** To learn the importance of various dental tissues in forensic sciences.
- PO 8-** Attends dental hospital and general hospital postings, community camps
- PO 9-** Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO 10-** Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO 11-** Appreciate the role of dentofacial growth and development of malocclusion.

PRASAD KUMAR, K.P
Principal
KMCT Dental College

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PO 12- Train in various radiological techniques and its interpretations

PROGRAM SPECIFIC OUTCOME (PSO)

PSO1- Attaining integrated learning which is multidisciplinary involving various other basic specialities such as with general anatomy, physiology and biochemistry.

PSO2- Training methods wherein various oral structures will be demonstrated and the students will be guided in making the same as a part of simulation-based learning.

PSO3- Students will be provided opportunities for experiential learning. Presenting seminars, involving in group discussions, making of charts and models.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

COURSE OUTCOME BDS

COURSE: DENTAL ANATOMY AND ORAL HISTOLOGY

COURSE OUTCOME (CO)

CO 1- Appreciate the normal development, morphology, structure & functions of oral tissues.

CO 2- Basic knowledge of various laboratory techniques used in oral histology.

CO 3- Identifying physiologic ageing process in the dental tissues.

CO 4- Appreciate the histology of dental tissues.

PROGRAME OUTCOME BDS

COURSE: DENTAL ANATOMY AND ORAL HISTOLOGY

2022-2023

PROGRAME OUTCOME

- PO 1-** Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO 2-** Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO 3-** Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO 4-** Motivation for interdisciplinary research activities and emphasis on evidence-based dentistry.
- PO 5-** Participation in Continual Dental Educational programs to update knowledge and skills
- PO 6-** Learns significance of infection and cross infection control in dental practice
- PO 7-** To learn the importance of various dental tissues in forensic sciences.
- PO 8-** Attends dental hospital and general hospital postings, community camps
- PO 9-** Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO 10-** Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO 11-** Appreciate the role of dentofacial growth and development of malocclusion.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PO 12- Train in various radiological techniques and its interpretations

PROGRAM SPECIFIC OUTCOME (PSO)

PSO1- Attaining integrated learning which is multidisciplinary involving various other basic specialities such as with general anatomy, physiology and biochemistry.

PSO2- Training methods wherein various oral structures will be demonstrated and the students will be guided in making the same as a part of simulation-based learning.

PSO3- Students will be provided opportunities for experiential learning. Presenting seminars, involving in group discussions, making of charts and models.

PROGRAMME SPECIFIC OUTCOME (PSO)

PSO1- Effectively treating patients who are medically compromised

PSO2- Application of recent diagnostic modalities in dental patients

with systemic illness PSO3- Emergency medical management of dental patient

Course Outcome (CO)

CO 1- Special emphasis should be given throughout on the importance of various diseases as applicable to dentistry.

CO 2- Special precautions/ contraindication for anesthesia in oral and dental procedures in different systemic diseases.

CO 3- Oral manifestations of systemic diseases. CO 4- Medical emergencies in dental practice.

CO 5- A dental student is taught in such a manner that he/she is able to record the arterial pulse, blood pressure and be capable of suspecting by sight and superficial examination of the body, diseases of the heart, lungs, kidneys, blood etc.

CO 6- He should be capable of handling medical emergencies encountered in dental practice.

ANATOMY INCLUDING EMBRYOLOGY AND HISTOLOGY

2022-2023

Program outcome

- PO 1.**Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO 2.**Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO 3.**Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO 4.**Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- PO 5.**Participation in Continual Dental Educational programs to update knowledge and skills
- PO 6.**Learns significance of infection and cross infection control in dental practice
- PO 7.**To learn the importance of various dental tissues in forensic sciences.
- PO 8.**Attends dental hospital and general hospital postings, community camps
- PO 9.**Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO 10.**Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO 11.**Appreciate the role of dentofacial growth and development of malocclusion.
- PO 12.**Train in various radiological techniques and its interpretations

Program specific outcome (PSO)

- PSO 1) Simulation based learning
- PSO 2) Experiential based learning on cadaver and histological specimens
- PSO 3) Integrated learning with dental anatomy

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

COURSE OUTCOME (CO)

Co 1) Learn to dissect & demonstrate the cadavers & the knowledge is correlated with living subjects during medical examinations.

Co 2) Know the anatomical basis of disease & injury.

Co3) Know the microscopic structure of the various tissues, a pre-requisite for understanding of the disease processes.

Co4) Have an idea about the nervous system to locate the site of lesions, an idea about the basis of abnormal development, critical stage of development, effect of teratogens, genetic mutations.

Co5) Know the sectional anatomy of head, neck & brain to read the features in radiographs.

PROGRAMME OUTCOME- BDS

COURSE - GENERAL PATHOLOGY

PROGRAMME OUTCOME 2022-2023

PO1.Integration of basic sciences, clinical dental surgery and practical and laboratory skills

PO2.Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient

PO3.Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.

PO4.Motivation for interdisciplinary research activities and emphasis on evidence based dentistry

PO5.Participation in Continual Dental Educational programs to update knowledge and skills

PO6.Learns significance of infection and cross infection control in dental practice

PO7.To learn the importance of various dental tissues in forensic sciences.

PO8.Attends dental hospital and general hospital postings, community camps

PO9.Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.

PO10.Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PO11.Appreciate the role of dentofacial growth and development of malocclusion.

PO12.Train in various radiological techniques and its interpretations

PROGRAM SPECIFIC OUTCOME

PSO1- Recent advances in hypersensitivity reaction

PSO2- Newer medicaments for healing without scarring

PSO3- Advanced diagnostic aids

COURSE OUTCOME

At the end of the course the student should be competent to:

CO1-Apply the scientific study of disease processes, which result in morphological and functional alterations in cells, tissues and organs to the study of pathology and the practice of dentistry.

CO2- To demonstrate and analyze pathological changes macroscopically explain their observations in terms of disease processes.

CO3-To integrate knowledge from the basic sciences, clinical medicine and dentistry in the study of Pathology.

CO4-To demonstrate understanding, of the capabilities and limitations of morphological Pathology in its contribution to medicine, dentistry and biological research.

CO5- To demonstrate ability to consult resource materials outside lectures, laboratory and tutorial classes.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PROGRAMME OUTCOME BDS

COURSE : ORAL AND MAXILLOFACIAL SURGERY

2022-2023

- PO1. Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO2. Sufficient practical skill including patient management skill for treatment of patients of all ages with special referen to pediatric, geriatric and medically compromised and disabled patient
- PO3. Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO4. Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- PO5. Participation in Continual Dental Educational programs to update knowledge and skills
- PO6. Learns significance of infection and cross infection control in dental practice
- PO7. To learn the importance of various dental tissues in forensic sciences.
- PO8. Attends dental hospital and general hospital postings, community camps
- PO9. Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO10. Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11. Appreciate the role of dentofacial growth and development of malocclusion.
- PO12. Train in various radiological techniques and its interpretations

PROGRAM SPECIFIC OUTCOME (PSO)

- PSO1: planning a comprehensive and patient specific treatment plan to improve the over all esthetic concerns and disproportion through cosmetic surgeries like orthognathic surgery
- PSO2: Basic and detailed learning of head and neck anatomy and techniques of attaining local anesthesia
- PSO3: Perform history taking and communicate effectively with patients and other professional in a surgical setting, perform common technical skills surgical setting.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

COURSE OUTCOME (CO)

1. Be able to apply the knowledge gained in the basic medical and clinical subjects in the management of patients with surgical problems.
2. Be able to diagnose, manage and treat patients with basic oral surgical problems.
3. Understand and practice the basic principles of asepsis and sterilization.
4. Be competent in the extraction of the teeth under local anesthesia.
5. Able to provide primary care and manage medical emergencies in the dental office.
6. Be familiar with the management of major oral surgical problems and principles involved in the in-patient management.

2. PROGRAM SPECIFIC OUTCOME (PSO):

PSO1 : Planning a comprehensive dental treatment protocol according to the medical status of the patient.

PSO2 : Training the students to identify oral manifestations of systemic diseases.

PSO3 : Incorporating recent advances in imaging in the curriculum for the students.

3. COURSE OUTCOME (CO):

CO1 : Be able to identify the common dental problems like dental caries and periodontal disease and their sequelae.

CO2 : Be able to differentiate normal variations and oral mucosal lesions

CO3 : Be able to identify precancerous and cancerous lesions of the oral cavity and refer to the concerned speciality.

CO4 : Knowledge about the laboratory investigations and interpretations of the result.

CO5 : Adequate knowledge about the medical complications that can arise while treating systemically compromised patients and take prior precautions.

CO6 : To formulate a clinical diagnosis, order investigations and seek expert consultations to come to a final diagnosis and chart out proper treatment.

CO7 : Be competent to take intra oral radiographs and interpret radiographic finding.

CO8 : Gain adequate knowledge of various extra oral radiographic procedures.

PROGRAMME OUTCOME BDS

COURSE: ORAL MEDICINE AND RADIOLOGY

1. PROGRAM OUTCOME (PO):

1. Integration of basic sciences, clinical dental surgery and practical and laboratory skills
2. Sufficient practical skill including patient management skill for treatment of patients of all ages

DR. MANOJ KUMAR, K.P.
Principal
KMCT Dental College

PROGRAMME OUTCOME BDS 2022-2023

COURSE: PEDODONTICS AND PREVENTIVE DENTISTRY

PROGRAM OUTCOME (PO)

- PO1** - Integration of basic sciences, clinical dental surgery and practical and laboratory skills.
- PO2** - Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient.
- PO3** - Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO4** - Motivation for interdisciplinary research activities and emphasis on evidence based dentistry.
- PO5** - Participation in Continual Dental Educational programs to update knowledge and skills
- PO6** - Learns significance of infection and cross infection control in dental practice
- PO7** - To learn the importance of various dental tissues in forensic sciences.
- PO8** - Attends dental hospital and general hospital postings, community camps
- PO9** - Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO10** - Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11** - Appreciate the role of dentofacial growth and development of malocclusion.
- PO12** - Train in various radiological techniques and its interpretations.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PROGRAM SPECIFIC OUTCOME (PSO)

PSO1 - planning a comprehensive treatment protocol according to child's attitude and behavior towards dentistry and dental health care needs.

PSO2 - Effectively treating dental problems in pediatric patients who are medically compromised, physically challenged and special children.

PSO3 - Application of recent trends and advanced treatment modalities and approaches during pediatric dental practice.

COURSE OUTCOME (CO)

CO1-Be able to instill a positive attitude and behavior in children towards oral health and understand the principles of prevention and preventive dentistry right from birth to adolescence.

CO2- Be able to guide and counsel the parents/guardian in regards to various treatment modalities including different facets of preventive dentistry.

CO3-Be able to manage the physically and mentally challenged / disabled children effectively and efficiently, tailored to the needs of individual requirement and conditions.

CO4- Detailed history taking & clinical examination formulating diagnosis and planning comprehensive treatment for the child.

CO5-Permanent Restorations: Permanent and deciduous teeth Amalgam or glass ionomer cement

CO6-Removable orthodontic appliances Space maintainers Habit breakers / Hawley's appliance

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

Oral Pathology and Microbiology

Program Outcome (PO)- BDS 2022-2023

Course: Oral Pathology and Microbiology

Program Outcome-PO

PO1.Integration of basic sciences, clinical dental surgery and practical and laboratory skills

PO2.Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient

PO3.Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.

PO4.Motivation for interdisciplinary research activities and emphasis on evidence based dentistry

PO5.Participation in Continual Dental Educational programs to update knowledge and skills

PO6.Learns significance of infection and cross infection control in dental practice.

PO7.To learn the importance of various dental tissues in forensic sciences.

PO8.Attends dental hospital and general hospital postings, community camps.

PO9.Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.

PO10.Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.

PO11.Appreciate the role of dentofacial growth and development of malocclusion.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PO12. Train in various radiological techniques and its interpretations.

Program specific outcome- PSO

PSO1- Integrated Learning which is multidisciplinary with other specialties like General Pathology, General Microbiology and General Medicine. Aiding Exposure to advanced diagnostic procedures

PSO2- Training methods wherein the students demonstrated and guided in understanding various pathologic conditions. Teaching will be enhanced using models.

PSO3- Students will be encouraged to attend clinicopathologic presentations, present seminars involve in group discussions, making of charts and models

Course outcome- CO

CO1-Appreciate the clinical and microscopic features of common lesions affecting oral tissues.

CO2- Identifying the tooth anomalies

CO3-Appreciate the hematological preparations of common disorders like anemia.

CO4-Understanding of the basic exercises in Forensic Odontology such as histological methods of age estimation

CO5- Person Identification with cheiloscopy / **Estimating** age and gender for forensic studies

PROGRAME OUTCOME BDS

COURSE : ORTHODONTICS 2022-2023

PROGRAME OUTCOM (PO)

- 1.Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- 2.Sufficient practical skill including patient management skill for treatment of patients of all ages
with special reference to pediatric, geriatric and medically compromised and disabled patient
- 3.Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- 4.Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- 5.Participation in Continual Dental Educational programs to update knowledge and skills
- 6.Learns significance of infection and cross infection control in dental practice
- 7.To learn the importance of various dental tissues in forensic sciences.
- 8.Attends dental hospital and general hospital postings, community camps
- 9.Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries,
infections and deformities of the jaw.
- 10.Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- 11.Appreciate the role of dentofacial growth and development of malocclusion.
- 12.Train in various radiological techniques and its interpretations

Program specific outcome(PSO)

PSO1- planning a comprehensive treatment protocol for growth modification in growing adolescents

PSO 2- effective treatment planning using cephalometry and model analysis

PSO 3- Simulation based learning

DR. RAJIOJ KUMAR. K.P
Principal

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

Course outcome(CO)

1. Understand about normal growth and development of facial skeleton and dentition.
2. Be able to pinpoint aberrations in growth process both dental and skeletal and plan necessary treatment.
3. Be able to diagnose the various malocclusion categories.
4. Be able to motivate explain to the patient parent/guardian about necessity of treatment.
5. Be able to plan and execute preventive orthodontics (space maintainers or space regainers).
6. Be able to plan and execute interceptive orthodontics (habit breaking appliances).
7. Be able to manage treatment of simple malocclusion such as anterior spacing using removable appliances.
8. Be able to handle delivery and activation of removable orthodontic / myofacial appliances.
9. Be able to diagnose and appropriately refer patients with complex malocclusion to the specialist.

KMCT DENTAL COLLEGE
PROGRAM OUTCOMES BDS

2022-2023

COURSE: PUBLIC HEALTH DENTISTRY

- PO1:** Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO2:** Practical skill including apatient management skill for treatment of patients of all ages
with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO3:** Sociological aspects of health care particularly oral health care including the reasons for the
variation in oral and dental needs of the society.
- PO4:** Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- PO5:** Participation in Continual Dental Educational programs to update knowledge and skills
- PO6:** Learns significance of infection and cross infection control in dental practice
- PO7:** To learn the importance of various dental tissues in forensic sciences.
- PO8:** Attends dental hospital and general hospital postings, community camps
- PO9:** Administer all forms of local anesthesia knowledge of various maxillofacial problems like
injuries,
infections and deformities of the jaw.
- PO10:** Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11:** Appreciate the role of dentofacial growth and development of malocclusion.

ERIMANOJ KUMAR, K.P
Principal

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PO12: Train in various radiological techniques and its interpretations

PROGRAM SPECIFIC OUTCOME (PSO)

PSO1: Train students in identifying prevalence of common oral disease and provision of basic dental health care in community setting.

PSO2: Train students to apply risk based assessment of patients and apply this knowledge in modifying risk factors for prevention of Oral diseases.

PSO3: Train students in planning for Comprehensive treatment management of patients.

DR. MANOJ KUMAR, K.P
Principal
KMCT Dental College
Mangalery, Mulkam

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

COURSE OUTCOMES (CO)

- CO1.** Apply the principles health promotion disease prevention.
- CO2.** Have knowledge of the organization and provision of health care in community and in the hospital service
- CO3.** Have knowledge of the prevalence of common dental conditions in India
- CO4.** Have knowledge of community based and preventive measures.
- CO5.** Have knowledge of the social, cultural and environmental factors, which contribute to health or illness
- CO6.** Be able to administer hygiene instructions, topical fluoride therapy and fissure sealing
- CO7.** Be able to educate patients concerning the etiology and prevention of oral disease and encourage them to assure responsibility for their oral health.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

PROGRAMME OUTCOME BDS

COURSE: PROSTHODONTICS AND CROWN AND BRIDGE

PROGRAM OUTCOME

- PO1** - Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO2** - Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO3** - Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO4** - Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- PO5** - Participation in Continual Dental Educational programs to update knowledge and skills
- PO6** - Learns significance of infection and cross infection control in dental practice
- PO7** - To learn the importance of various dental tissues in forensic sciences.
- PO8** - Attends dental hospital and general hospital postings, community camps
- PO9** - Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO10** - Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11** - Appreciate the role of dentofacial growth and development of malocclusion.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS.

DR. VANDANA KUMAR, ICP
KMCT Dental College
Mukkam, Kozhikode

PROGRAM SPECIFIC OUTCOME (PSO)

PSO2 – Effectively treating patients with maxillofacial defects after RTA or radiation therapy.

PSO3 - Implant

COURSE OUTCOME (CO)

CO1 - Be able to understand and use various dental materials.

CO2 -Be competent to carry out treatment of conventional Simple complete and partial removable dentures and anterior crowns.

CO3 - Be able to analyze Prosthodontic laboratory procedures.

CO4 - Be familiar with the concepts of osseointegration and the value of implant supported Prosthodontic procedures.

CO5 - Be able to diagnose and appropriately refer patients requiring complex treatment procedures to the specialist.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

KMCT Medical College Campus, Mukkam, Kozhikode - 673602

PROGRAMME OUTCOME BDS

COURSE: PHARMACOLOGY 2022-2023

PROGRAM OUTCOME (PO)

- PO1** - Integration of basic sciences, clinical dental surgery and practical and laboratory skills.
- PO2** - Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient.
- PO3** - Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO4** - Motivation for interdisciplinary research activities and emphasis on evidence based dentistry.
- PO5** - Participation in Continual Dental Educational programs to update knowledge and skills
- PO6** - Learns significance of infection and cross infection control in dental practice
- PO7** - To learn the importance of various dental tissues in forensic sciences.
- PO8** - Attends dental hospital and general hospital postings, community camps
- PO9** - Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO10** - Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11** - Appreciate the role of dentofacial growth and development of malocclusion.
- PO12** - Train in various radiological techniques and its interpretations.

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

Principal
KMCT Dental College
Manassery, Mukkam

PROGRAM SPECIFIC OUTCOME (PSO)

- PSO1** - integrated learning of drug interactions and indications with a clinical case scenario
PSO2 - blended learning with student and faculty participation.
PSO3 - Simulation based learning in laboratory setup and also experimental learning.

COURSE OUTCOME (CO)

- CO1**- Should be able to explain the pharmacokinetics and pharmacodynamics of essential and commonly used drugs in dental practice
- CO2**- Gain knowledge and ability to identify indications, contraindications, interactions, and adverse reactions of commonly used drugs in dental practice.
- CO3**- Know prescription and prescription errors.
- CO4**- Prescribe drug for common dental ailments as well to know the drugs used for medical emergencies and common ailments.
- CO5**- Evaluate pharmacy preparations and drug formulations, and comment on the labelled information
- CO6**- Analyze and interpret certain clinical problems and therapeutic exercises.
- CO7** - Able to be a part of pharmacovigilance

Recognised by UGC u/s 2(f), Accredited by NAAC with A+ Grade, Approved Research Centre of KUHS

COURSE: PERIODONTOLOGY 2022-2023

PROGRAMME OUTCOME

- PO1** - Integration of basic sciences, clinical dental surgery and practical and laboratory skills
- PO2** - Sufficient practical skill including patient management skill for treatment of patients of all ages with special reference to pediatric, geriatric and medically compromised and disabled patient
- PO3** - Sociological aspects of health care particularly oral health care including the reasons for the variation in oral and dental needs of the society.
- PO4** - Motivation for interdisciplinary research activities and emphasis on evidence based dentistry
- PO5** - Participation in Continual Dental Educational programs to update knowledge and skills
- PO6** - Learns significance of infection and cross infection control in dental practice
- PO7** - To learn the importance of various dental tissues in forensic sciences.
- PO8** - Attends dental hospital and general hospital postings, community camps
- PO9** - Administer all forms of local anesthesia knowledge of various maxillofacial problems like injuries, infections and deformities of the jaw.
- PO10** - Restoration of various kinds and endodontic procedures, removable and fixed prosthodontics.
- PO11** - Appreciate the role of dentofacial growth and development of malocclusion.
- PO12** - Train in various radiological techniques and its interpretations.

COURSE OUTCOME

On completion of the undergraduate training programme the graduate will:

CO1- Be able to diagnose the patient's periodontal problem, plan and perform appropriate periodontal treatment.

CO2 - Be Competent to educate and motivate the patient.

CO3 - Be Competent to perform thorough oral prophylaxis, subgingival scaling, root planning and minor periodontal surgical procedures.

CO4 - Give proper post treatment instructions and do periodic recall and evaluation.

CO5 - Be Familiar with concepts of osseointegration and basic surgical aspects of implantology.

INSTITUTION 2
INTEGRATION
COUNCIL

2. PROGRAM SPECIFIC OUTCOME (PSO):

PSO1 : Planning a comprehensive dental treatment protocol according to the medical status of the patient.

PSO2 : Training the students to identify oral manifestations of systemic diseases.

PSO3 : Incorporating recent advances in imaging in the curriculum for the students.

3. COURSE OUTCOME (CO):

CO1 : Be able to identify the common dental problems like dental caries and periodontal disease and their sequelae.

CO2 : Be able to differentiate normal variations and oral mucosal lesions

CO3 : Be able to identify precancerous and cancerous lesions of the oral cavity and refer to the concerned speciality.

CO4 : Knowledge about the laboratory investigations and interpretations of the result.

CO5 : Adequate knowledge about the medical complications that can arise while treating systemically compromised patients and take prior precautions.

CO6 : To formulate a clinical diagnosis, order investigations and seek expert consultations to come to a final diagnosis and chart out proper treatment.

CO7 : Be competent to take intra oral radiographs and interpret radiographic finding.

CO8 : Gain adequate knowledge of various extra oral radiographic procedures.
