4.3.1 Library is automated using Integrated Library management system (ILMS)

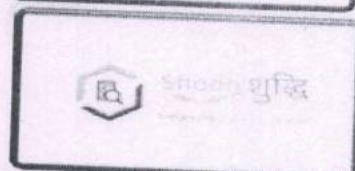

Name and features of ILMS software-Koha 19.11.22.000

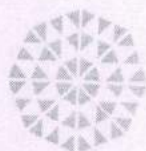

Nature and extent of automation- Fully

Year of commencement and completion of automation-2011

KMCT dental college library has all the facility to acquire, manage, and disseminate information to students and faculty. There is facility for the use of library services and for individual and group study. A library spread over 12800 sq.ft. with over 7000 books and 100 plus international and national journals provide a scholarly environment for learning.

The library has an infrastructure consisting of Reception, Property counter, Issue counter, digital library and photocopying area. There is a reading room to accommodate 50% of total student strength. There are separate Postgraduates & staff reading room, Journal section and reference section. There is a computer section to access the digital journals and text books. The reference books and back volumes are arranged properly for easy retrieval.

KMCT Dental College Central Library ILMS (Integrated Library Management System)

An integrated management system performs library automation and collection development broken into different modules like acquisition, cataloguing and circulation that commonly done by library.

The main advantages of ILMS is to save space of library and time of staff and users, maintain accuracy and avoid duplication with better control over collection.

Library Management Software (KOHA)

KOHA is open-source library automation software that works best with ILS (Integrated Library System). KMCT Dental College Central Library uses this Open source Library management software.
